Dr. Andrew Weaver – Author of Keeping our Cool, Professor at the UVic School of Earth and Ocean Sciences, Intergovernmental Panel on Climate Change (IPCC) member Nobel Laureate winner

Guy Dauncey – Author of The Climate Challenge: 101 Solutions to Global Warming, President of the BC Sustainable Energy Association

Jamie Biggar (Common Energy), Tria Donaldson (Powershift), and Maia Green (Youth Delegation coordinator) - Canadian Youth Delegation to Copenhagen

Find out about the science, policies, and politics surrounding the most important global summit of the 21st century, the United Nations Conference on Climate Change in Copenhagen from December 7 to 18, 2009.

Climate change is the #1 threat to our planet, killing our forests, acidifying our oceans, intensifying storms, diminishing food supplies, threatening mass extinctions, and becoming a driver of resource scarcity, massive dislocation of populations, and wars.

Copenhagen presents the most crucial opportunity at a pivotal time in the planet's future to create a successor treaty to the Kyoto Accord to move the planet towards a solution before runaway global warming takes effect.

YOUR participation at this event will help to ensure that the Canadian government is forced to become a climate leader, not an international laggard and obstructionist.

Please recruit your friends, family, co-workers, and classmates to come out!
